Size	About 476 x 479 x 492 mm (width x depth x height)
Weight	About 27.1 kg

BEFORE YOU CHOOSE, SIX QUESTIONS

- 
How many pages a month, roughly?
 The single figure that sizes the machine. Too small and it wears out; too big and you pay for speed you never use.
- 
How much of it is colour?
 Colour pages cost more to run than black. If most of your printing is mono, the machine and the agreement should reflect that.
- 
Do you need A3?
 Plans, posters and some forms need it. Most offices do not, and an A4 machine is smaller and cheaper to run.
- 
How much scanning, and to where?
 Email, shared folders and cloud storage are all set up differently. Tell us where scans should land and we configure it on the day.
- 
Stapling, folding, booklets?
 Finishing is an option on most models, added at the quote. It is far cheaper to specify now than to add later.
- 
How many people share it?
 Decides trays, paper capacity and whether one machine is enough. We would rather tell you two smaller ones than sell you one big one.

WHAT HAPPENS AFTER YOU SAY YES

Delivery and setup

-  Delivered and installed by trained technicians, not dropped at the door
-  Placed, levelled and connected on site
-  Drivers installed on your computers
-  Scanning to email and folders tested with you
-  Your old machine taken away when you ask

Every month after

-  Toner supplied under the agreement, delivered before you run out
-  Meter readings collected for you, so billing is on actual pages
-  One number for service, toner and readings
-  A machine number on the DSA sticker that the customer portal recognises
-  Parts and labour covered under the agreement

IMPORTANT INFORMATION

1. Specifications on this sheet are taken from Toshiba's Australian product page for the e-STUDIO339CS (toshiba-business.com.au) and were checked on 11 September 2026. Manufacturers change specifications between releases without notice. The current model, its speed, its capacity and its options are confirmed in writing in our quote, and the quote is what we supply against.
2. Some items listed are optional and are not included unless our quote says so. Paper capacity, finishing and additional trays in particular vary by configuration.
3. Speeds are the manufacturer's rated speeds for A4 at the stated settings. Real world output depends on the document, the paper and the settings in use.
4. Finance, rental and lease are arranged through our finance partner and are subject to their approval and terms. Outright purchase is available on every model.
5. Pricing is confirmed by quote. Prices on this sheet, where shown, are guides only and include GST unless stated.
6. Toshiba and the model names on this sheet are trade marks of their owners and are used only to identify the equipment. Document Services Australia is an independent supplier and service provider. This sheet is prepared by Document Services Australia and is not a Toshiba publication.
7. Service agreement terms, including included pages, toner coverage, response and what is and is not covered, are set out in the agreement itself, which takes precedence over this sheet.
